## techniCAL signs Distribution deal with FasTest®

techniCAL Systems 2002 Inc. is pleased to announce that it has signed a distribution agreement with FasTest Inc. of Roseville, MN USA. In the picture are: Mark Reid, V.P., Sales & Marketing – techniCAL (left) and Steve Amell, Regional Sales Manager – FasTest, Inc. (right).

Under the agreement, techniCAL will distribute *FasTest's* ergonomically designed *Process* connection tools which improve productivity, product quality and user comfort; so as to eliminate sealants, thread damage and wrench tightening, and benefit from an improved calibration process and quality at reduced costs.

Oil refineries, power generation plants, paper processing, pharmaceutical and cosmetic manufacturing are a few industries that rely on the accuracy of their transmitters, control valves and pressure sensing instrumentation. These instruments require on-going verification and calibration to ensure instrument accuracy. Furthermore, third party calibration labs will benefit from improved productivity.

*FasTest's* patented pressure assisted grip and seal method provides a leak tight connection, resulting in the highest level of accuracy in the fastest time possible.

Contact techniCAL at [www.technical-sys.com](http://www.technical-sys.com) or call 1-86-MEASURE-1 (1-866-327-8731) for more information.
