

WANTED DEAD OR ALIVE

UP TO \$300.00 REWARD

FOR THE CAPTURE AND CONVICTION OF AN OLDE PROMAC, MARTEL OR BETA CALIBRATOR WORKING OR NOT!

NEW BG321 shown

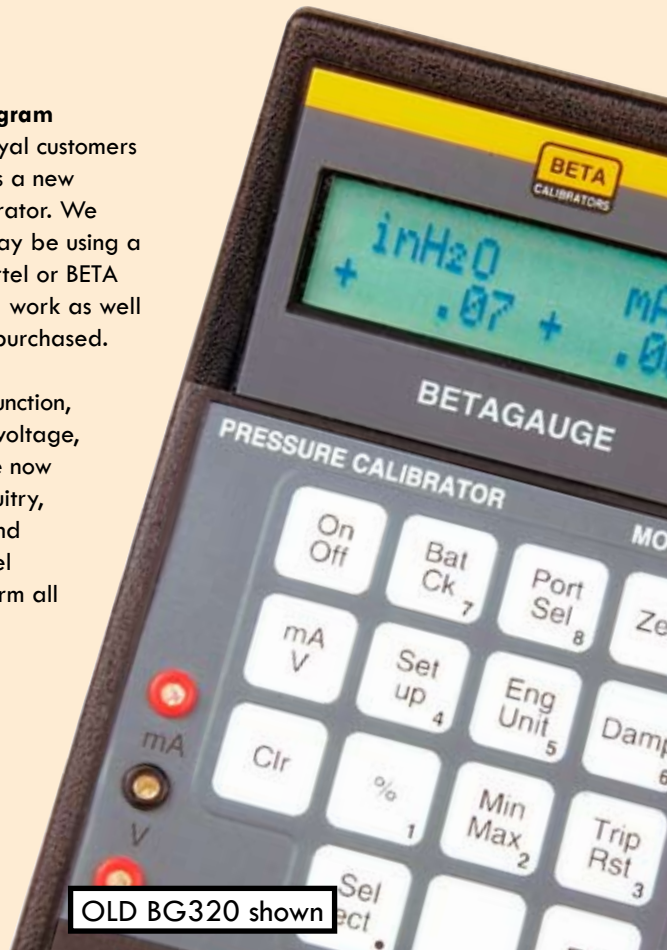

Martel Calibrator Trade In Program

We would like to reward our loyal customers with a trade in discount towards a new technologically advanced calibrator. We understand that many of you may be using a 5, 10, or even 15 year old Martel or BETA calibrator. These calibrators still work as well as they did the day they were purchased.

Martel's new calibrators (multifunction, temperature, pressure, current, voltage, etc.) have evolved and they are now even more advanced. New circuitry, better electronic components, and increased accuracy make Martel hand held calibrators out perform all others in the market!

Please contact us today for additional details.
